Westermeyer Industries Adds Two Oil Separator Designs to Catalog

Bluffs, Illinois—Westermeyer Industries is proud to announce that it now supplies both conventional and centrifugal oil separators. Each type of separator is available in sealed and serviceable styles. Westermeyer Industries' oil separators are priced competitively and delivered on time.

Testing has proven that these oil separators can be 99% efficient at removing oil from refrigerant gas.

Oil separators should be selected based on the tonnage of the system under normal operating conditions. These conditions are defined by the capacity (or BTUs) of the compressor as determined by the refrigerant gas and saturated suction and condensing temperatures of the operating system. For optimum sizing, select an oil separator with the nearest capacity to the systems load at the evaporating temperature.

To learn more about Westermeyer Industries' oil separators, view our online catalog at www.westermeyerind.com/catalog.htm or call us at 217.754.3277.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
