

## Angle Strainers

The angle strainers are manufactured out of steel and can be used in any application where fluids or gases need to be strained. This product is suitable for any fluid that is non-corrosive to brass.

The internal 100 mesh stainless steel screen can be removed for cleaning. A standard teflon gasket seals the removable cap. The cap should be detached or wet-ragged during the brazing process.

### Features

- Plated steel body
- 700 psig maximum working pressure
- Temperature rating: -20°F to 200°F
- Removable cap sealed with teflon gasket
- 100 mesh removable stainless steel screen
